INSTRUCTIONS

TO THE

CLERKS EMPLOYED IN CLASSIFYING THE

OCCUPATIONS AND AGES OF THE PEOPLE.

Introduction.

1. The OCCUPATIONS of the People are to be abstracted in conjunction with AGES from the Enumeration Books as regards—

(*a.*) All Persons *aged 5 years and upwards* who have *a specific occupation*:*

(*b.*) All Persons *aged 15 years and upwards*, whether returned as *with or without a specific occupation*, except as to certain Wives. *See* Instruction, No. 17, page 4.

2. Separate Abstract Sheets will be provided for MALES and FEMALES.

3. The mode of procedure is prescribed in the following Instructions, which are to be studied in conjunction with the Classified List and Alphabetical Index of Occupations hereto annexed.

Classified List.

4. The CLASSIFIED LIST embodies the principles upon which the various occupations are grouped first of all under *Six Grand Classes*, made up of *Eighteen Orders*, which are themselves divided into *numerous Sub-orders*. A brief explanation of the principles upon which the classification is based will be found at pp. 7–9, and the abstractor should familiarise himself therewith in order that he may be able to do his work intelligently and with facility.—

Explanation of Types used in Classified List.

(*a.*) In the Classified List certain occupations are printed in CAPITALS, in most cases having indented under them in small type, frequently in columnar form, a number of occupations either directly allied with or subsidiary to them, as for example :—

CHURCH, CHAPEL—OFFICERS :		
Beadle.	Churchwarden.	Precentor.
Bell Toller.	Clerk to Catholic Chapel.	Sacristan
Chapel Keeper.	Door Keeper at Synagogue.	Sexton.
Chorister.	Parish Clerk.	Sextoness.
Church Keeper.	Pew-opener.	Verger.
Church Labourer.		

This indicates that the occupation printed in CAPITALS is provided with a corresponding line in the Abstract

* Children *under 5 years of age* returned as engaged in some occupation are provided for by Instruction 9. Children *under 15 years of age* returned as "Scholar," "Pupil," are to be regarded as having no specific occupation. *See* Instruction 10.

Sheet, and that all its subsidiary occupations are to be included with it on that line by the Abstractor.

(*b.*) Then there are Occupations printed in *italic* type with others indented under them, as for example:—

Burial Ground, Cemetery—Service:

Secretary to Cemetery Company; Cemetery—Superintendent, Officer, Clerk, Lodge Keeper, Servant; Keeper of Jews' Burial Ground; Grave Digger.

The Occupation italicised is not provided with a line on the Abstract Sheet but will have to be written (if not already printed there) in its proper Sub-order among the *Supplemental Notes* at the bottom of the Abstract Sheet, and all the subsidiary occupations indented under the italicised Occupation are to be put to that Occupation by the Abstractor.

(*c.*) And lastly there are Occupations printed in ordinary type in separate lines, without indentation, *e.g.*:—

Copper, Steel—Plate Printer.
Zincographic—Artist, Printer, Worker.
Block Printer.
Printer in Colours, Oil Colour Printer.
Print—Seller, Publisher.

These Occupations have no lines corresponding with them on the Abstract Sheet, but will have to be separately written (if not already printed there) in their proper Sub-order among the Supplemental Notes at the bottom of the Abstract Sheet.

Alphabetical Index—Types and References.

5. The ALPHABETICAL INDEX comprises all the occupations contained in the Classified List arranged alphabetically so as to show the Order and Sub-order in which each occupation appears in the Classified List, and also whether such occupation has a line on the Abstract Sheets or is referred to the Supplemental Notes. If an occupation is printed in *either* of the working sheets, it appears in the Alphabetical Index and in the Classified List IN CAPITALS. If it is *only in the Male Sheet*, the letter (**M**) is printed against the name in the list. If it is *only in the Female Sheet*, the letter (**F**) is printed against it. When the name is to be found *both in the Male and Female Sheets*, it is printed in the Alphabetical Index, and in the Classified List, IN CAPITALS, without either of the letters (**M**) or (**F**). The figures indicate the numbers of the Order and Sub-order to which each Occupation should be referred; thus, in the case of "ACCOUNTANT, **6**: 1," the **6** represents the number of the Order, and 1 the number of the Sub-order where the name will be found in the Abstract Sheet. When the Occupation is *not* printed in Small Capitals, it is either to be referred to the particular Occupation indicated—thus "Accoucheur" to be ticked to "SURGEON, **3**: 3"—or to "*Others*" in the Order and Sub-order indicated by the reference numbers; example, "Aëronaut" should be ticked to "*Others*" of Order **3**, Sub-order **7**. Some Occupations are printed in *italic type* to indicate that they are to be distinguished in a particular manner in the Supplemental Notes (*see* Instruction, No. 4 *b. ante*).

Abstract Sheet.

6. The ABSTRACT SHEET contains all the occupations which are printed in CAPITALS in the Classified List and Alphabetical Index, arranged in the same order as in the Classified List, and

provided with columnar spaces for abstracting the occupations under *ten groups of ages*. At the bottom of the sheet are arranged the *Supplemental Notes* according to their proper Orders and Sub-orders, but without provision for age-groupings, and consequently the *precise age* for every occupation appearing in these Notes must be written in by the Abstractor.

Process of Abstracting.

7. The following rules are to be strictly followed in the process of abstracting:—

Supplemental Notes.

Having learnt by the Classified List or Alphabetical Index the Order and Sub-order to which each occupation belongs, turn to the Abstract Sheet, and if the Occupation is there printed, put a tick opposite its name in the proper column for the age. If it is *not* in the Abstract Sheet, (1) put the tick in the proper Sub-order opposite the word "*Others;*" and (2) turning to the corresponding Sub-order in the Supplemental Notes *write* there the name of the occupation (if it is not already printed), and insert opposite to it the exact age in *figures*.

In some Sub-orders the word "*Others*" does not occur in the Abstract Sheet. Should any occupation be met with belonging to one of these Sub-orders not provided for in the Sheet, a tick must be made opposite the occupation most nearly allied with the *exact occupation*, which latter, with the *precise age*, must be inserted in the Supplemental Notes in its proper order.

Every tick on the line "*Others*" on the Abstract Sheet must have a corresponding entry in the Supplemental Notes, and you must attend carefully to this point because the *number of ticks must exactly agree with the marginal entries in each Sub-order* before another district can be issued for abstracting.

Doubtful Cases.

8. After having carefully studied the Classified List and the Abstract Sheet you will generally be able to refer the persons in the several occupations to their appropriate places on the Sheet. Should you experience any difficulty in so doing, turn to the Alphabetical Index, and refer the occupation to the Order or Sub-order there indicated; if the particular trade or calling is not mentioned in the Index, apply for instructions to your Superintendent. Should you see any reason for deviating from the Index and Classified List you are to bring the matter under the notice of your Superintendent.

Occupations of Children under 5 years of age.

9. Children *under 5 years of age* will occasionally be found returned as engaged in some occupation; in such case the abstractor will put a tick against the proper occupation in the first column on the Abstract Sheet (age 5–10), and in addition make a note of the *precise age* and occupation in the blank space at the bottom right hand corner of the sheet.

Scholars under 15.

10. Children *under 15 years of age* returned as "Scholar," "Pupil," *are to be omitted altogether by the Abstractor* (*see note*).

Scholars 15 and upwards. Undergraduates.

11. Persons called "Scholars," "Pupils," "Students," "Collegians," "Undergraduates," *aged 15 years and upwards*, are to be put to "*Student*" in the Supplemental Notes of **3**: 4; but if

NOTE.—These children are abstracted (for England) on the "AGE AND CONDITION" Sheet.

Graduates.

they are distinguished by some collegiate honour, such as "B.A.," "M.A.," &c. they are to be put to "*Graduate of University*" in the Supplemental Notes of **3** : 4.

Farmers' Sons, Daughters, &c.

12. A FARMER'S Son, Grandson, Brother, Nephew, Daughter, Grand-daughter, Sister, or Niece, *aged* 15 *and upwards*, living at home, and *not described as of any specific occupation*, must be ticked on the line for that purpose in **8** : 1; but the same relatives, *of any age*, if returned as following an occupation (*e.g.*, "Agricultural Labourer," "Domestic Servant," "Housekeeper," "Governess,") must be referred to that occupation, subject to Instructions Nos. 23–25, p. 5.

Tradesmen's Sons, Daughters, &c.

13. A TRADESMAN'S Son, Brother, Grandson, or Nephew, *aged* 15 *and upwards*, living at home, and *not described as of any specific occupation*, if likely to be assisting in his relative's business, must be referred to that business. A Tradesman's Daughter, Sister, Grand-daughter, or Niece, under the same conditions, must be referred to "NO STATED OCCUPATION."

Female Relatives as "Housekeepers," &c.

14. When a Sister, Daughter, or other *female relative, of any age*, is described as "Housekeeper," "Servant," "Governess," &c., she must be referred to those occupations.

Cousins, Uncles, &c.

15. All other relatives (excepting WIVES) than those mentioned in the three preceding Instructions (*e.g.* "Cousins," "Uncles," &c.) if *aged* 15 *and upwards*, and not returned as of any specific Occupation, are to be put to "NO STATED OCCUPATION."

Wives of Innkeepers.
" Lodging-house Keepers.
" Shopkeepers.
" Farmers.
" Shoemakers.
" Butchers.

16. The WIVES of the following Persons are supposed to take part immediately in their Husband's business, and they are therefore to be ticked on their respective lines in **4** : 1, *unless they are expressly returned as following an independent occupation*, in which case they must be dealt with as hereafter directed:—

Wife of Innkeeper, Hotelkeeper, Publican, Beerseller.
Wife of Lodging House, Boarding House-Keeper.
Wife of Shopkeeper (branch undefined).
Wife of Farmer, Grazier (but not of Farm Bailiff).
Wife of Shoemaker.
Wife of Butcher.

This rule applies also where the husband is stated to have *formerly* been engaged in either of the said businesses.

Other Wives.

17. All WIVES, other than the foregoing, who are returned as *following an independent occupation* must have the exact nature of their occupation, together with their age, recorded in the space provided for that purpose at the foot of the Female Abstract Sheet; the total of these cases to be carried *in figures* by the Caster to the line "WIVES OF OTHER SPECIFIED OCCUPATIONS" in the body of the Sheet (**4** : 1). This instruction is not intended to apply to *doubtful* cases, but only to those in which the Wife is returned as herself following an occupation; thus, a woman returned as "Agricultural Labourer's Wife," or as "Grocer's Wife," must not be assumed to be herself an Agricultural Labourer or Grocer, but must be regarded simply as a Wife of no occupation, *and be omitted by the Abstractor.*

Widows.

18. WIDOWS, if engaged in any occupation, are to be referred to that occupation; if returned simply as "Widows" they must be put to "NO STATED OCCUPATION."

19. Persons returned as "Householders" with no other description must be ticked to "NO STATED OCCUPATION." "Householders."

20. If a Schoolmaster (private or public) is metwith, he must be ticked to "SCHOOLMASTER," in Order **3**: 8. The schoolmaster's assistant in a school, whether called "tutor," "usher," &c., must be ticked to "SCHOOLMASTER." All "private tutors," teaching either in families or on their own account, must be ticked to "TEACHER, &c." in **3**: 8. A Clergyman who is also a Schoolmaster must be ticked to "SCHOOLMASTER." Schoolmasters.

21. All persons returned as Farmers, whether farming a large or small number of acres, must be ticked to "FARMER," in **8**: 1. Farmers.

22. A "Freeholder," if a *farmer* as well, must be ticked to "FARMER." If he is not called a farmer the tick must be made to "LAND PROPRIETOR." A "Leaseholder," if in a town, to be referred to "HOUSE PROPRIETOR"; if in the country, to "LAND PROPRIETOR." Freeholders.

23. Any man or boy employed on a Farm, whether described as "Carter," "Cowman," "Shepherd," "Agricultural Labourer," "Groom," &c., *if living with the Farmer*, must be ticked to "FARM SERVANT (IN-DOOR)," in **8**: 1. If he is *not living with the Farmer*, he must (except in the case of a "Shepherd," for whom there is a separate line on the Abstract Sheet) be referred to "AGRICULTURAL LABOURER, OUT-DOOR," in the same Sub-order. An Agricultural Labourer's son living at home and described as a "Servant," is assumed to be occupied in farm work, and is therefore referred to "AGRICULTURAL LABOURER." Farm Servants (Male). Agricultural Labourers.

24. "Carters" (not otherwise described) if in large manufacturing or commercial towns, will generally be referred to "CARMAN, &c." in **7**: 2, but in ordinary provincial towns to "AGRICULTURAL LABOURER." Carters.

25. The *female* servants of a farmer's family should *generally* be referred to "FARM SERVANT IN-DOOR"; but if the duties of the servant are described as simply those of a household servant, such as a "Cook," "Housemaid," "General Servant," she must be referred to the Sub-order for Domestic Servants, **5**: 2. Farm Servants (Female).

26. "Clerks," "Cashiers," and all superior officers employed in *Banks* to be ticked to "BANK SERVICE"; but not the Messengers, Porters, Watchmen, &c., who are to be referred to "MESSENGER, PORTER" in **7**: 6. Bank Clerks.

27. The Clerks to *Professional Men* (Lawyers excepted) and others, such as Army Agents, Auctioneers, Railway Contractors, &c., are to be referred to "COMMERCIAL CLERK," unless otherwise directed in the Alphabetical Index. "Law Clerks" are provided for in Sub-order **3**: 2. Clerks to Professional Men.

28. Persons returned as "Assistant," "Apprentice," &c., where no clue whatever is given to the nature of the occupation, must be referred to the Indefinite Order **16**: 2. "Assistant," "Apprentice."

29. All persons engaged in any *Manufacture* or *Trade* are to be ticked against that manufacture or trade, unless otherwise directed by the Classified List and Index. This will apply not only to the immediate workers of the machines by which the manufacture is carried on, but to the masters, clerks, overlookers, warehousemen, carriers, &c. engaged in the manufactory. Manufactures and Trades.

Errand Boys.

30. "Errand Boys" are not to be referred to the trade in which they are employed, but to "MESSENGER, PORTER" in **7**: 6.

Titled Persons.

31. Persons described by titles or honours (*except Peers of the United Kingdom*) and all foreigners so described (example: "Count of Holy Roman Empire,") are to be put to "GENTLEMAN," in the abstract sheet; but if they hold any office, or follow any profession or occupation they must be classed accordingly. Unmarried Peeresses and Ladies of Title, if *aged* 15 *and upwards*, to be put to "GENTLEWOMAN"; if married they must be treated as Wives of no occupation, and therefore be omitted by the abstractor. Ladies belonging to Her Majesty's Court and Household are to be referred to Sub-order **1**: 1.

Retired Persons.

32. Persons retired from business are to be referred to their former occupation whenever that is returned.

Public Institutions.

33. All the Officers, superior as well as inferior, of a Public Institution, (*not being a Military or Naval Hospital, a Workhouse, a Pauper Industrial School, a Prison, a Reformatory, or a Convent*, are to be referred to "INSTITUTION SERVICE" (**5**: 1). The Officers of a Military or Naval Hospital are to be referred to the Supplemental Notes of Sub-orders **2**: 1 or **2**: 2, as the case may be; the Officers of a Workhouse or Industrial School to "UNION PARISH, &c. OFFICER," **1**: 2, and the Officers of a Convent to "*Convent—Superior, Inmate*," in the Supplemental Notes of **3**: 1.

Officers of Military or Naval Hospitals.

Officers of Workhouse.

Officers of Convent.

Chaplain and Medical Officers of Institutions.

The Chaplain and Medical Officers of *all* Public Institutions, *if resident*, are to be classified in the same manner as the other Officers of such Institutions, but if *non-resident* it is assumed that they are only partially engaged in duties connected with the Institutions, and they should then be referred to "CLERGYMAN" (**3**: 1) or "SURGEON" (**3**: 3, respectively. The Wives and Families of *all* Institution Officers are to be dealt with as in ordinary private families, except such of them as are stated to hold any office connected with the Institution: thus, a Prison Warder's Wife described as "Assistant Matron" must be put to "PRISON OFFICER" (**1**: 2), but if described as "Dressmaker" she should go to "MILLINER, DRESSMAKER" (**11**: 5). The Inmates of *all* Institutions, *except Convents*, are to be referred to their several occupations, when those are stated; otherwise, *if aged* 15 *and upwards*, they are to be put to "NO STATED OCCUPATION." The Inmates of Convents, if aged 15 and upwards, are to be referred to "*Convent Inmate*" in the Supplemental Notes of **3**: 1; Convent Pupils under 15 years of age to be treated as ordinary Scholars.

Wives and Families of Institution Officers.

Inmates of Institutions.

Inmates of Convents.

Double Occupations.

34. If a person is found to have more than one occupation, the tick must be put to the *most important* of them, which will generally be that entered first. Exceptions to this rule would be persons returned as (say) "Clergyman—Chaplain to Army Hospital"; "Surgeon—Resident Medical Officer of Lunatic Asylum"; "Clerk in Orders—Schoolmaster"; who must be referred to "*Officer of Army Hospital*" (in Supplemental Notes of **2**: 1), to "INSTITUTION SERVICE" (**5**: 1), or to "SCHOOLMASTER" (**3**: 8) respectively.

Ambiguous Names.

35. There are many terms, like "labourer," "weaver," "assistant," which are used in different occupations. In every case

PUBLIC RECORD OFFICE

learn, if possible, the manufacture, trade, or business in which the person so described is engaged. Apply to your Superintendent for information in doubtful cases.

Provincial Terms.

36. *In different parts of the country, the* SAME NAME *is used to designate* DIFFERENT OCCUPATIONS. This is the case with the word "merchant," "clothier," and others. ***Different names have also been applied to the same occupation.*** The man, for instance, who lays tiles or slates on a roof is, in London, &c. called a "*tiler*," or "*slater*"; but, in the Western Counties he is called a "*parchester*." "Cordwinder" is used in the same counties for "cordwainer," or "shoemaker." "Clothier" in Yorkshire means "clothmaker," whereas in other localities it means "clothes dealer or seller." Take care, therefore, to avoid errors from this confusion of terms, and inquire of your Superintendent in all cases of doubt. It is frequently found that an occupation mentioned by one name in the Abstract Sheet is known by some local name in particular parts of the country. In such a case the tick must be put to the name in the Abstract Sheet, writing in the margin the local or peculiar name. Manufactures must be treated in this way. Any *branch* of a manufacture ticked on the line for that manufacture must have the name of that branch, ***as it is described in the book***, written in the margin, at least once in each new sheet.

Branches of a Manufacture.

New or peculiar Occupations.

37. **Any remarkable circumstance—such as children under 5 years of age returned as following an occupation, the existence** of a new occupation, or the exceptional localization of an occupation or branch of industry—which may be observed in the process of abstracting, should be noted in the blank space at the bottom right-hand corner of the Abstract Sheet.

SHORT EXPLANATION OF THE CLASSIFICATION.

I.—PROFESSIONAL CLASS. (Orders **1, 2, 3.**)

The three first Orders consist of civil servants, national or local; the army and navy; the learned professions, with their immediate subordinates; literary and scientific men, as well as artists in the widest sense.

The army (2; 1) and navy (2; 2) are in the service of the Government; and are intimately connected with it in all states. And the clergy in the Established Church, as well as the lawyers in the courts of justice, are in official subordination to the Sovereign; but the great majority of the members of these professions are neither nominated nor paid by the Crown. Like the medical, the literary, and the scientific professions, which were at one time included in the Church, and were supported by its livings, the clergy and lawyers assert their independence, and are therefore made separate Sub-orders. So are authors, artists, musicians, actors, teachers, and scientific men. Nearly all the members of the class are paid directly for their services; and these services are direct, being rarely fixed in any commodity.

The pay varies in each Order, and it is either proportional to the time (salaries, wages, pay), the job (fees), or the quality and quantity of work done (piecework).

II.—Domestic Class. (Orders **4** and

The persons in this Class are all employed, if they are employed at all, in houses. Some supply simply service others with it supply board and lodging (Order **5**.) They are paid wages (servants), or they are paid for the board and lodging and attendance which they supply. The publicans and beersellers are so much associated and so often confounded with hotel and inn keepers that they are retained in the same Order; although the Order dealing in "drinks" may claim them. Wives perform at home for the bulk of the population the same kind of duties as persons in Order **5** perform; but they are not paid directly in money for their services, as they form a part of the natural family; consequently they are distinguished in a separate Order (**4**.)

III.—Commercial Class. (Orders **6** and **7**.)

The merchant buys tea in China, transports it to England, and there sells it. As a merchant he effects no change in any of the commodities in which he deals. He simply buys as cheaply and sells as dearly as he can; and is thus paid for his services by a varying but rated profit on the goods.

The carrying order convey commodities, passengers, and messages by land or water, from one place to another. They also warehouse goods. They are paid for their services in fares, freight, and charges, which bear some proportion to the weight, bulk, and other properties of the goods. They are all in Order **7**., and are closely related to the Order preceding; hence the two Orders (**6**–**7**.) together may be called the Commercial Class.

IV.—Agricultural Class. (Orders **8** and **9**.)

We now come to a great Class which is employed in producing grain, fruit, grass, animals, and other products from the soil. They may be called growers; for their products grow, and are obtained from the living kingdoms of nature. The heads of the Class are paid, not directly for their services, but indirectly in the price of the products which they sell in the market or elsewhere. Thus the price of a quarter of wheat includes the pay of the services of all the persons employed in its production or in the acquisition of the tools and machines, including the land, by means of which it is produced and brought to market. Agricultural servants and labourers are paid in wages, which the farmers advance. The persons engaged in gardens or woods are in separate Sub-orders.

The men in Order **9** are employed in catching, training, or dealing in living animals of various kinds. They are the representatives of the hunters of the early stages of civilization; and may be considered an appendage to the previous pastoral and agricultural class; so forming Class IV.

V.—Industrial Class. (Orders **10, 11, 12, 13, 14,** and **15.**)

This is the Class of makers or artizans. They deal in matter that is either no longer living, or that never lived. They alter the form, texture, or composition of the materials in which they work, so as to produce a great variety of new goods, instruments, and machines. Their pay and profits are charged in the price of commodities; the wages of the workmen being advanced by their masters.

This Class is classified according to the materials, distinguishing those derived from the three kingdoms of nature.

The first Order of the Class includes artizans, making products of various materials, derived sometimes from the three kingdoms, such as coaches, ships, workshops, factories, houses, and their furniture or other contents.

Then follow the persons engaged in the textile fabrics. Wool, silk, cotton, flax, and hemp are durable, and divisible, so they are particularly favourable to the sub-division of labour, and the application of machinery. They constitute the essentially manufacturing class. In a Sub-order are the artizans who convert the textile fabrics, and some other matters, into dress.

Human food, drinks, and stimulants, derived from the animal and vegetable kingdoms, occupy a distinct Order, sub-divided into three Sub-orders.

Then follow (**13**) the persons chiefly or exclusively working and dealing in animal substances, (**14**) those working and dealing in vegetable substances, and (**15**) those working and dealing chiefly in minerals and metals. The first Sub-order of the latter Order (**15**) includes the mining population of every kind; the other thirteen Sub-orders include the workers in the chief metals and minerals in use, beginning with coal and ending with steel.

VI.—Indefinite and Non-productive Class. (Orders **16, 17, 18.**)

The last class includes the numbers returned in a vague way, so as to scarcely admit of classification among either the professional, the domestic, the commercial, the agricultural, or the industrial classes.

It embraces the totally distinct Order of general labourers, persons of property returned as of no occupation, and persons supported by the community.

NOTE.—The name of an Occupation printed in Small Capitals—thus, "ACCOUNTANT"—indicates that it will be found in the *Male* or *Female* Abstract Sheet.

The letter (M) printed before the name of the Occupation indicates that it will be found only in the *Male* Abstract Sheet; the letter (F) indicates that the Occupation will be found only in the *Female* Abstract Sheet.

Where the name of the Occupation appears in Small Capitals without the letter (M) or (F), it implies that the Occupation will be found in *both* the Abstract Sheets.

The figures indicate the numbers of the Order and Sub-Order to which each Occupation should be referred; thus, in the case of "ACCOUNTANT. **6**: 1," the 6 represents the number of the Order, and 1 the number of the Sub-Order where the name will be found in the Abstract Sheet.

When the Occupation is *not* printed in Small Capitals it is either to be referred to the particular Occupation indicated—thus, "Accoucheur" to be ticked to "SURGEON. **3**: 3"—or to "*Others*" in the Order and Sub-Order indicated by the reference numbers; example, "Aëronaut" should be ticked to "*Others*" of Order 3, Sub-Order 7.

Some Occupations are printed in *Italic type* to indicate that they are to be distinguished in a particular manner in the Supplemental Notes (*see* Instruction No. (4), page 2).

In some cases where the branches of an industry are numerous, a strictly alphabetical arrangement has not been followed, but the occupations connected with the root or staple of such industry have been placed first, and then follow the occupations compounded from that root or staple. Thus—the Iron Workers and Dealers are arranged so that "Iron Caster," "Iron Dealer," IRON MANUFACTURE," "Iron Stamper," &c. take precedence of "Iron Bedstead Maker," "Iron Lamp Maker," "IRONMONGER," &c.

The Abstractor must not assume that an occupation is not to be found in the Index until he has carefully searched through the list of the compound as well as simple terms of such occupation.
